#### Flagged items & Actions

8 flagged, 1 action

Flagged items 8 flagged, 1 action

Part 1 - Farm Review / Animals/Wildlife/Livestock

Crop production areas are not located near or adjacent to dairy, livestock, or fowl production facilities unless adequate barriers exist.

No

Adjacent farm has dairy cows roaming but per our last meeting they will be reinforcing the fence.

Photo 1

Part 1 - Farm Review / Manure and Municipal Biosolids / No Manure/Biosolids Used

#### A previous land use risk assessment has been performed.

No

This is old land for fruits and vegetables but we scheduled the risk assessment this coming weekend to avoid disruptions.

To Do | Assignee mailarae o'santos | Priority Medium | Due 26.06.2023 09:30 PST | Created by SafetyCulture Staff

Conduct a risk assessment

Part 1 - Farm Review / Manure and Municipal Biosolids / No Manure/Biosolids Used

## Crop production areas that have been subjected to flooding are tested for potential microbial hazards.

No

Part 1 - Farm Review / Conclusion: Part 1 - Farm Review

Farm Review Fail

Part 3 - House Packing Facility / Receiving

Product delivered from the field which is held in a staging area prior to packing or processing is protected from possible contamination.

No

Our staging area is far from the dairy farm but the assessment will make us 100% sure that we remain food safe.

Part 3 - House Packing Facility / Packing House General Housekeeping

Pipes, ducts, fans and ceilings which are over food handling operations, are clean.

No

Looks like we missed cleaning the 2nd fan this week.

Photo 2

Part 7 - Preventive Food Defense Procedures / Secure Employee/Visitor Procedures

Food defense training has been provided to all employees.

No

We have a newly hired employee and he is yet to be trained. Training will be completed tomorrow.

Part 7 - Preventive Food Defense Procedures / Secure Facility Procedures

Uniforms, name tags, or identification badges are collected from employees prior to the termination of employment.

No

William, our staff who went AWOL 2 weeks ago is yet to surrender his access badge but everyone is aware that he is no longer with us.

Other actions 0 actions

Water Usage

What is the source of irrigation water? (Pond, Stream, Well, Municipal, Other)

Municipal

How are crops irrigated? (Flood, Drip, Sprinkler, Other)

Sprinkler

A water quality assessment has been performed to determine the quality of water used for irrigation purpose on the crop(s) being applied.

Yes

A water quality assessment has been performed to determine the quality of water use for chemical application or fertigation method.

Yes

If necessary, steps are taken to protect irrigation water from potential direct and nonpoint source contamination.

Yes

## **Sewage Treatment**

100%

The farm sewage treatment system/septic system is functioning properly and there is no evidence of leaking or runoff.

Yes

There is no municipal/commercial sewage treatment facility or waste material landfill adjacent to the farm.

Ye

### Animals/Wildlife/Livestock

1 flagged, 83.33%

Crop production areas are not located near or adjacent to dairy, livestock, or fowl production facilities unless adequate barriers exist.

No

Adjacent farm has dairy cows roaming but per our last meeting they will be reinforcing the fence.

Photo 1

Manure lagoons located near or adjacent to crop production areas are maintained to prevent leaking/overflowing, or measures have been taken to stop runoff from contaminating the crop production areas.

Yes

We are in no risk of being contaminated by the new dairy farm's manure

Manure stored near or adjacent to crop production areas is

Yes

### contained to prevent contamination of crops.

| Measures are taken to restrict access of livestock to the source or delivery system of crop irrigation water.  Crop production areas are monitored for the presence or signs of wild or domestic animals the entering the land.  Measures are taken to reduce the opportunity for wild and/or domestic animals from entering crop production areas.  Manure and Municipal Biosolids  Please choose one of the following options as it relates to the farm operations:  No Manure/Biosolids Used  No animal manure or municipal biosolids are used. #### **Comments/Recommendations:**

The property nearby that have been turned into a dairy farm has potentially placed our farm at risk and we need to reassess to make sure we remain food safe. We will have a better idea of how compliant we will be after the assessments his weekend.

Farm Review Fail

| Part 2 - Field Harvest and Field Packing Activities   |     | 100% |
|---|-----|------|
| Field Sanitation and Hygiene  |     | 100% |
| A documented pre-harvest assessment is made on the crop production areas. Risks and possible sources of crop contamination are noted and assessed.  | Yes |      |
| The number, condition, and placement of field sanitation units comply with applicable state and/or federal regulations.   | Yes |      |
| When question above is answered "N/A" (sanitation units are not required), a toilet facility is readily available for all workers.  | Yes |      |
| Field sanitation units are located in a location that minimizes the potential risk for product contamination and are directly accessible for servicing.   | Yes |      |
| A response plan is in place for the event of a major spill or leak of field sanitation units or toilet facilities.  | Yes |      |
| Field Harvesting and Transportation   |     | 100% |
| All harvesting containers and bulk hauling vehicles that come in direct contact with product are cleaned and/or sanitized on a scheduled basis and kept as clean as practicable.                  | Yes |      |
| All hand harvesting equipment and implements (knives, pruners machetes, etc.) are kept as clean as practical and are disinfected on a scheduled basis.  | Yes |      |
| Damaged containers are properly repaired or disposed of.  | Yes |      |
| Harvesting equipment and/or machinery which comes into contact with product is in good repair.  | Yes |      |
| Light bulbs and glass on harvesting equipment are protected so as not to contaminate produce or fields in the case of breakage.   | Yes |      |
| There is a standard operating procedure or instructions on what measures should be taken in the case of glass/plastic breakage and possible contamination during harvesting operations.           | Yes |      |
| There is a standard operating procedure or instructions on what measures should be taken in the case of product contamination by chemicals, petroleum, pesticides or other contaminating factors. | Yes |      |
| For mechanically harvested product, measures are taken  | Yes |      |

during harvest to inspect for and remove foreign objects such as glass, metal, rocks, or other dangerous/toxic items.

| Harvesting containers, totes, etc. are not used for carrying or storing non- produce items during the harvest season, and farm workers are instructed in this policy.             | Yes  |
|---|------|
| Water applied to harvested product is microbially safe.   | Yes  |
| Efforts have been made to remove excessive dirt and mud from product and/or containers during harvest.  | Yes  |
| Transportation equipment used to move product from field to storage areas or storage areas to processing plant which comes into contact with product is clean and in good repair. | Yes  |
| There is a policy in place and has been implemented that harvested product being moved from field to storage areas or processing plants are covered during transportation.        | Yes  |
| In ranch or field pack operations, only new or sanitized containers are used for packing the product.   | Yes  |
| Packing materials used in ranch or field pack operations are properly stored and protected from contamination.  | Yes  |
| Product moving out of the field is uniquely identified to enable traceability in the event of a recall.   | Yes  |

Receiving 1 flagged, 50%

Product delivered from the field which is held in a staging area prior to packing or processing is protected from possible contamination.

No

Our staging area is far from the dairy farm but the assessment will make us 100% sure that we remain food safe.

Prior to packing, product is properly stored and/or handled in order to reduce possible contamination.

Yes

## Washing/Packing Line

100%

If applicable, the temperature of processing water used in dump tanks, flumes, etc., is monitored and is kept at temperatures appropriate for the commodity.

Source water used in the packing operation is potable.

Yes

Processing water is sufficiently treated to reduce microbial contamination.

Yes

Water-contact surfaces, such as dump tanks, flumes, wash tanks and hydro coolers, are cleaned and/or sanitized on a scheduled basis.

Yes

Water treatment (strength levels and pH) and exposure time is monitored and the facility has demonstrated it is appropriate for the product.

Yes

Food contact surfaces are in good condition; cleaned and/or sanitized prior to use and cleaning logs are maintained.

Yes

Product flow zones are protected from sources of contamination.

Yes

The water used for cooling and/or making ice is potable.

Yes

Any ice used for cooling produce is manufactured, transported and stored under sanitary conditions.

Yes

## **Packing House Worker Health & Hygiene**

100%

Employee facilities (locker rooms, lunch and break areas, etc.) are clean and located away from packing area.

Yes

When there is a written policy regarding the use of hair nets/beard nets in the production area, it is being followed by

N/A

all employees and visitors.

| · ,  |                   |
|--|-------------------|
| When there is a written policy regarding the wearing of jewelry in the production area, it is being followed by all employees and visitors.              | N/A               |
| Packing House General Housekeeping   | 1 flagged, 93.33% |
| Only food grade approved and labeled lubricants are used in the packing equipment/machinery.   | Yes               |
| Chemicals not approved for use on product are stored and segregated away from packing area.  | Yes               |
| The plant grounds are reasonably free of litter and debris.  | Yes               |
| The plant grounds are reasonably free of standing water.   | Yes               |
| Outside garbage receptacles/dumpsters are closed or are located away from packing facility entrances and the area around such sites is reasonably clean. | Yes               |
| Packing facilities are enclosed.   | Yes               |
| The packing facility interior is clean and maintained in an orderly manner.  | Yes               |

| Preventive Food Defense Procedures  | Pass |

## Completion

#### **Overall Comments**

The biggest risk to our food safety is the new dairy farm on the nearby property. I know the owners and we are in talks so that we have fence reinforced.

The risk assessment to be conducted this weekend will help us make sure that there will be no issue moving forward.
