Untitled Page

Are employees comfortable with the devices being used?

No

Untitled Page

Is there adequate ventilation and lighting in the workplace?

No

It's often too dark to get around without a flashlight.

Photo 1

Is there a fire detector system in place in the employee's remote work environment?

Yes

Are furniture and electrical peripherals leveled and balanced?

Yes

Are employees comfortable with the devices being used?

No

What is being affected?

Concentration

We're getting too reliant on using flashlights that we struggle to work.

How can this be solved?

Improving working lights, as well as provide us more equipment for this.

Is there adequate ventilation and lighting in the workplace?

No

It's often too dark to get around without a flashlight.

Photo 1

Are pathways to entrances and exits easily passable?

Yes

Are floorings clear of possible trip or fall risks?

Yes

Are there accessible emergency exits?

Yes

What are other risks to safety to be aware of?

Inadequate light in general
