A - Assessment

What you think is going on

his is a 23-year-old female with history of common cold and whooping cough and reporting for sore throat, fever and fatigue. Clinical examination suggests bacterial pharyngitis due to swollen lymph nodes and the presence of white patches on throat.

1. Pharyngitis
2. High Fever (caused by pharyngitis)
3. Severe Fatigue (caused by pharyngitis)

P - Plan

What you will do about it

1. Acetaminophen
2. Penicillin (500mg) x 5 days.

No labs or consults. Follow up after 5 days if symptoms persist or worsen. Drink plenty of water and intake Vitamin C
